COLLECTORS OF NOVELTIES IN IRIS

Dear Iris Lovers,

We wish to thank our many customers and new friends who made our first year such a success, thus making possible this, our second annual Iris catalog which has grown in both size and the amount of color.

Our big project this past season was in moving all of our iris to our new home in Rialto, California, which is located in the fertile foothills of the San Bernardino Mountains at an elevation of 1400 feet. We have found this location to be ideal for the raising of healthy iris. The soil is rich, sandy loam which promotes the strongest root growth we have seen. Combine this with our warm semi-tropical temperatures which averaged about 85 degrees the year around and you have an ideal growing combination that results in large, husky, iris rhizomes. Thus we are able to ship, anywhere in the world, iris that will grow and bloom. ALL THE IRIS WE SHIP WILL BE DUG FROM OUR NEW FIELDS — GUARANTEEING YOU GROWING SUCCESS.

Some very remarkable things are being developed by the Iris hybridizers across the United States. This means we will have many exciting surprises in the near future. A few of these surprises to look for this season are: High Heaven, First Violet, Never Mohr, Orange Apricot, New Adventure, Queens Lace, and two of the most outstanding, Tom Craig's lovely creations, Frances Craig and Mary McLellan, both Dykes Medal material.

Everyone here in Southern California is busy preparing their gardens for the 1956 American Iris Society Convention. From the size and artistic grandeur of the plantings this convention is going to be one of the largest and most beautiful. We are looking forward to meeting all Iris lovers who can attend.

We hope to hear from you soon.

Sincerely,
JULIAN WELLS

NEW 1956 INTRODUCTIONS

After years of careful selection of our seedlings we are introducing three iris which we believe are outstanding. There are none in commerce now which are like them in either form or color intensity.

BLOOMIN' LOVE (J. Wells)

((Josephs Mantle x Novelty sib) x Heatherlands)

This heavily ruffled giant plicata with a cream ground and delicately stippled, brilliant, rose pink border is remarkably floriferous; for it has many buds on its 40" wide branched stems. One of the most outstanding plicatas we have ever seen — it was Love at First Sight. Each \$25.00

CONQUEROR (J. Wells)

(((((China Maid x Tiffany))) x Molten) x ((Rich Raiment x Savage) x ((China Maid x Tiffany) x Rosired))

This deep red flower is not a brown red. It is more rich than bright and reminds me of the deep coal red of crimson Maple leaves in the fall. Besides its good qualities of form and color, this fine flower makes an exceptional garden plant because of the strong rapid growth and abundant bloom. Each \$20.00

RED TANGO (J. Wells)

((((Josephs Mantle x Molten))) x Cheeks of Tan) x Burnish Bronze x War Dance))

This full flaring flower has a metallic toughness to go with the coppery iridescence that gives added brilliance to the clear terracotta red self color of this outstanding flower. The color is very hot and a shade of red unknown to the iris world. Each \$25.00
